

**In the Claims:**

Kindly cancel claims 12, 13, 14 and 15, without prejudice to the applicant. A complete listing of claims pursuant to 37 C.F.R. 121 is as follows:

Claim 1. (previously presented) An arrow rest comprising a bracket adapted to be mounted on a bow with one end extended in line with the draw of the bow, an arm pivotally mounted in the extended end of the bracket, a ring positioned perpendicularly to the bow rotatably mounted on said arm, means for mounting the bracket on a bow with the ring positioned whereby an arrow in the shooting position on one side of the bow extends through the ring, and means to rotate the ring to swing to a position disengaging the ring from the arrow.

Claim 2. (previously presented) An arrow rest of claim 1 wherein the ring is made of a resilient, high friction material.

Claim 3. (previously presented) An arrow rest of claim 2 wherein the ring is of a generally elliptical shape and positioned at an approximately 45 degree angle when the bow is in the non-drawn position.

Claim 4. (currently amended) An arrowrest comprising a bracket with one end adapted to be attached to the a bow, and the other end extending out in line with the draw of the bow, a shaft passing perpendicularly through the opposite end of the bracket, a ring fixedly mounted on an end of the shaft, a resilient means around the shaft urging the shaft and ring to such a position that the ring is parallel to the bow, a resistant means for urging the ring to a position whereby an arrow is securely held by the ring when the bow is drawn to a shooting position.

Claim 5. (previously presented) An arrow rest of claim 4 wherein the ring is made of a resilient, high friction material.

Claim 6. (previously presented) An arrow rest of claim 5 wherein the ring is of a generally elliptical shape and positioned at an approximately 45 degree angle when the bow is in the non-drawn position.

Claims 7 - 15. (cancelled)
